The Software Factory of Zaragoza

Mission and goals

The Software Factory of Zaragoza

- The new internal Software Factory for Alliance Boots
- Our **mission**: to deliver the most efficient and innovative development service for Alliance Boots in our 4 competence areas:
 - Integration
 - Web
 - Mobile
 - Business Intelligence
- Our main **goals**:
 - To provide the best possible “value for money”
 - To guarantee quality and adherence to standards
 - To boost synergies and code reusability
 - To drive and support innovation

TSF-Z Competence areas

Main standard technologies

Integration

TalenD
Datastage (legacy)
ESB

Web

J2EE
Liferay
PHP
.NET
Perl

Mobile

PhoneGap (HTML5 / CSS3)
DataOnOff

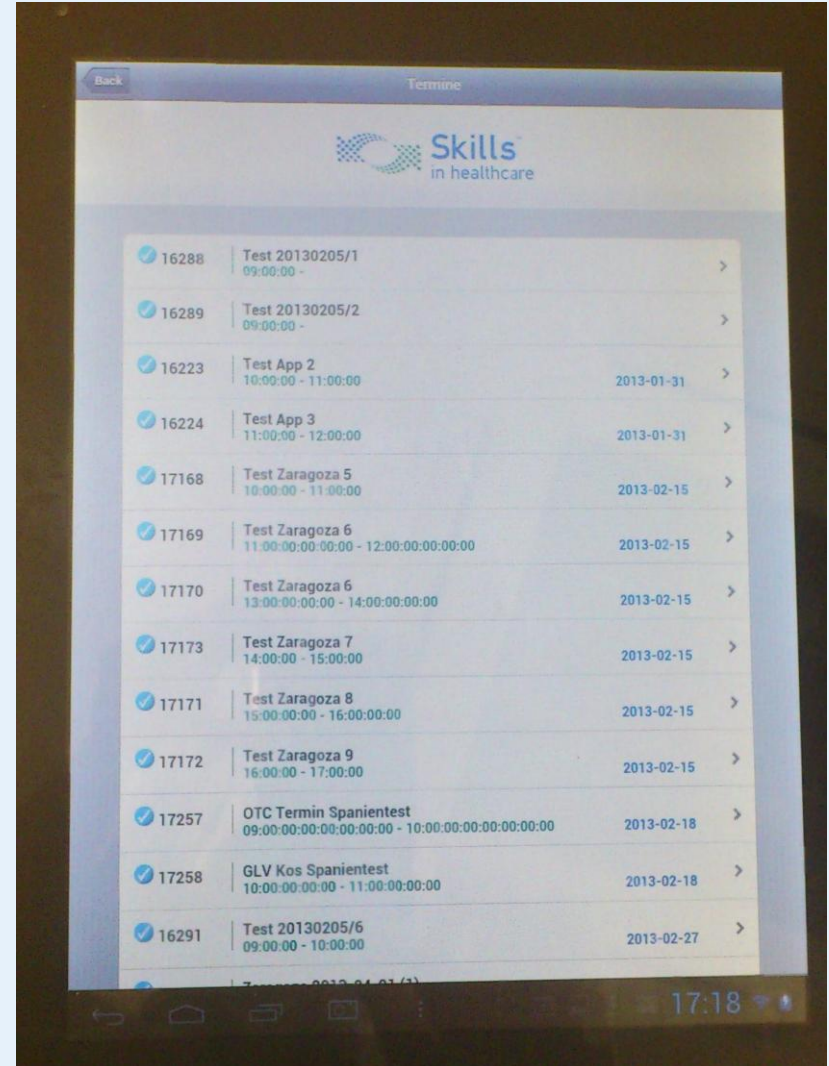

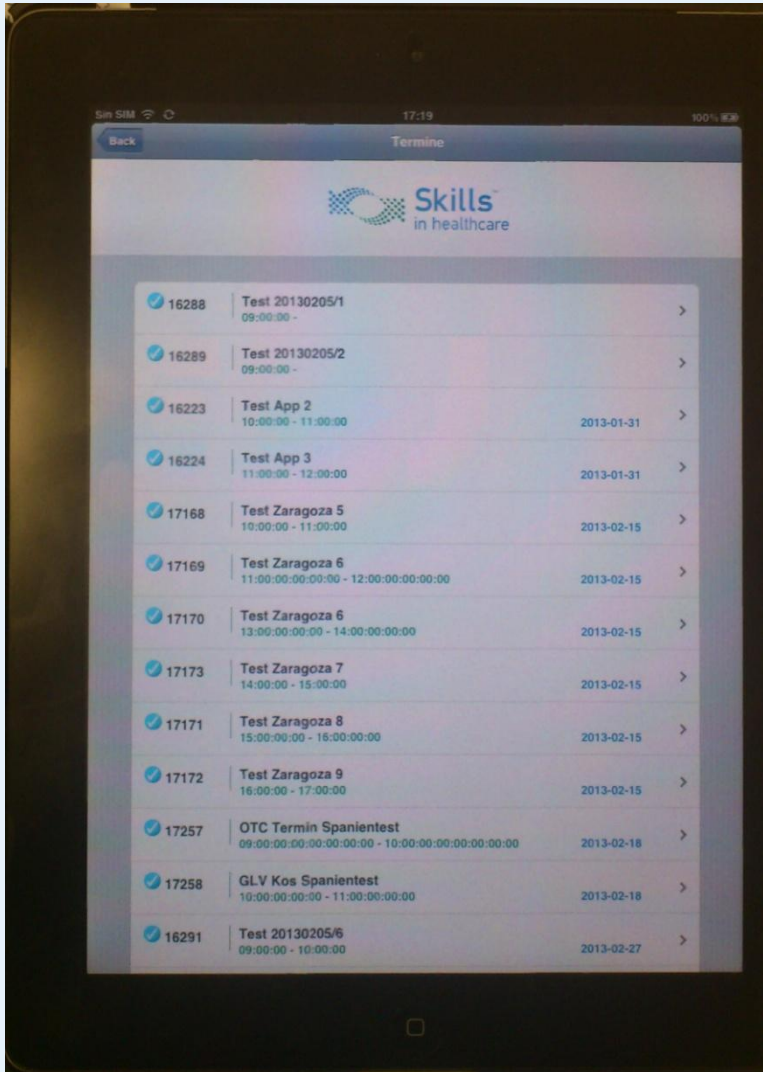

BI

QlikView

Development and support

- Projects delivered internationally (France, Germany)
- Projects under development (Germany, UK, Italy)
- MIDiA Technologies used / not used:
 - Windows PhoneGap backend (part of MIDiA)
 - Standard PhoneGap (iOS + Android backends)
 - DataOnOff component planned but not used yet.
- Main benefits achieved:
 - Cost effectiveness in development: one source code, multiple target platforms.
 - Synergies between our countries.
 - Build reputation as a center of excellence for mobile development → more work is coming to us.
